

PRACTICAL 5

Q} Display a simple <pre> tag to display any ascii design. Create a HTML webpage.

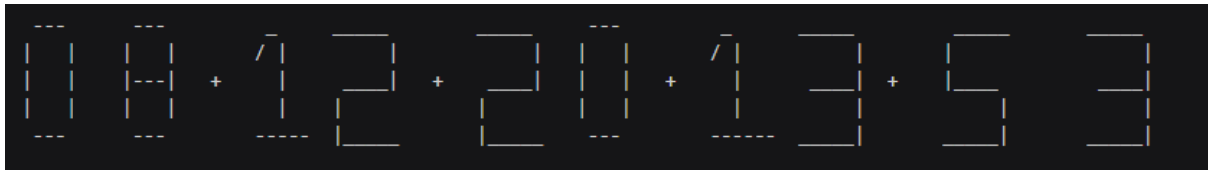

Ans }

➤ **CODE :-**

```
<!DOCTYPE html>
<html lang="en">
  <head>
    <title>Document</title>
  </head>
  <body>
    <pre>
```

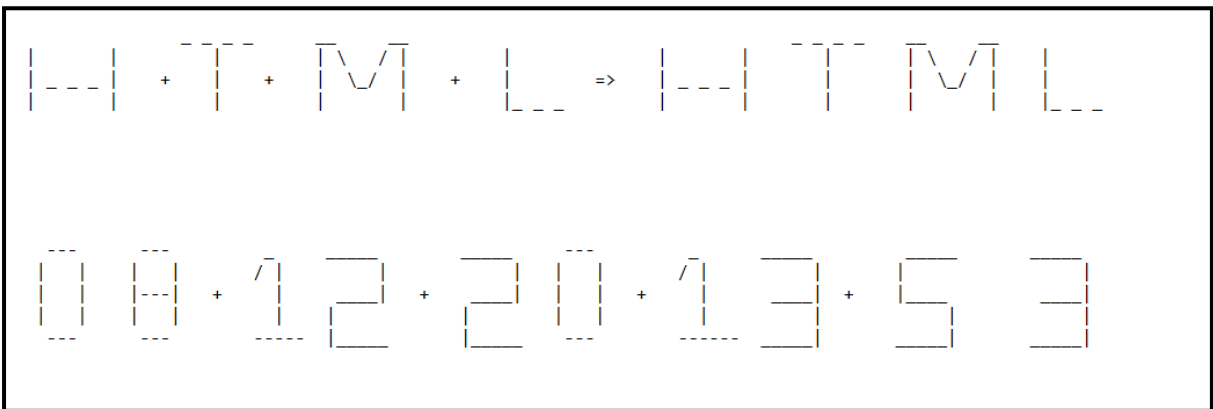

An ASCII art representation of the equation H + T + M = HTML. The characters are constructed using vertical and horizontal dashes. The 'H' is formed by two vertical lines and a horizontal base. The 'T' is a vertical line with a horizontal top bar. The 'M' is formed by two vertical lines and a central 'V' shape. The '=' is a horizontal line with a vertical bar in the middle. The 'HTML' is formed by the same 'H', 'T', and 'M' characters followed by an 'L' which is a vertical line with a horizontal base.

```
</pre>
</body>
```

An ASCII art representation of the equation 08 + 12 + 20 + 13 + 5 = 53. The numbers are constructed using vertical and horizontal dashes. The '0' is a vertical line with a horizontal base and a small vertical line on the right. The '8' is formed by two '0' shapes. The '1' is a vertical line. The '2' is a vertical line with a horizontal top bar and a curved bottom. The '0' is a vertical line with a horizontal base and a small vertical line on the right. The '1' is a vertical line. The '3' is a vertical line with a horizontal top bar and a curved bottom. The '5' is a vertical line with a horizontal top bar and a horizontal base. The '3' is a vertical line with a horizontal top bar and a curved bottom.

```
</pre>
</body>
</html>
```

❖ **OUTPUT :-**

The output of the HTML code, showing the ASCII art designs. The first design is H + T + M = HTML, and the second design is 08 + 12 + 20 + 13 + 5 = 53. The characters are constructed using vertical and horizontal dashes.
